

**“The new Archetype Encoding Process is currently in beta; some sounds may not be pleasant. Please preview tones before use and share your feedback, as it’s not always possible to create pleasant tones for every expanded option.”**

# FREQUENCY CONTROLS

---

## Frequency Shift

### Short Description:

Shifts the entire set of frequencies up or down to reach different energetic layers of the body or subtle fields.

### Expanded:

Use this to raise or lower the tonal range of your session. Higher values may access spiritual or cognitive layers, while lower shifts may target cellular, emotional, or grounding fields. Ideal for customizing the frequency spectrum based on the intention of the session.

---

## Shift Speed

### Short Description:

Controls how quickly frequencies move or modulate within a pattern, creating either stimulating or soothing effects.

### Expanded:

A higher shift speed creates a more dynamic and activating experience, often used for energizing or mental clarity. Slower speeds promote calmness and stability, aligning better with deep healing or integration sessions.

---

## Sub Bass

### Short Description:

Adds a deep foundational tone to ground and stabilize the entire frequency field.

**Expanded:**

This root frequency acts as the energetic “bass note,” connecting the listener to Earth energies and physical structures. Raising this setting enhances the feeling of being grounded, calm, and centered during the session.

---

 **AUDIO EXPERIENCE ENHANCERS**

---

**Enable 3D Sound**

**Short Description:**

Immerses the listener in a spatial sound field, creating a multi-dimensional healing experience.

**Expanded:**

3D Sound uses advanced spatialization to move frequencies around the listener’s field, helping to activate different parts of the energetic body. This enhances presence, depth, and the feeling of being enveloped by healing resonance.

---

**Enable Vibration Therapy**

**Short Description:**

Engages physical vibration to reinforce the sound therapy with tactile frequency delivery.

**Expanded:**

This mode allows frequencies to be physically felt (if supported by hardware), helping to embed healing tones into the body through somatic resonance. It supports cellular activation, tissue regeneration, and grounding.

---

# WAVEFORM & TONE MODES

---

## **Resonant Pulse Length**

### **Short Description:**

Determines how long each frequency is held to allow full energetic integration before shifting.

### **Expanded:**

The longer a frequency is sustained, the deeper it can entrain your energetic field. Use longer durations for deep meditative states, healing intentions, or chakra clearing. Shorter pulses are ideal for alertness, movement, and stimulation.

---

## **Frequency Transition Smoothing**

### **Short Description:**

Controls how softly one tone shifts into the next, ensuring a fluid sonic experience.

### **Expanded:**

Smooth transitions create harmony between tones and prevent abrupt energetic interruptions. Slow ramps are perfect for emotional integration or sleep support; faster ramps may be used in peak-focus sessions or energetic awakenings.

---

# TONE ACTIVATION MODES

---

## **Activate Sonic Signature**

### **Short Description:**

Generates a personalized harmonic code based on your input — unique to your intention or word.

### **Expanded:**

This mode converts words or phrases into unique frequencies using proprietary algorithms. It's ideal for imprinting affirmations, healing intentions, or conscious language into sound, creating a truly personalized energy broadcast.

---

## **Activate Archetype Encoding**

### **Short Description:**

Infuses tones with symbolic, mythic, or soul-level patterns based on ancient archetypes.

### **Expanded:**

Use this to access deeper layers of the psyche or soul via encoded sonic forms inspired by Jungian archetypes, sacred geometry, and universal blueprints. Ideal for subconscious transformation or emotional healing.

---

## **Activate Archetype Encoding (Beta)**

### **Short Description:**

Experimental mode offering deeper soul-level encodings through advanced harmonic overlays.

### **Expanded:**

This beta feature introduces subtle archetypal resonances not found in standard modes. Great for deep inner work, shadow integration, or tapping into soul contracts and ancestral patterns.
